**Time** : 9.00am – 12.00pm  
**Topic** : Motorised External Venetian Blinds  
**Speakers** : **Mr. Morgan Ho**  
Chief Executive Officer  
Maxtrack

### **Speakers' Biography**

#### **Mr. Morgan Ho**

*Chief Executive Officer  
Maxtrack*

Morgan Ho is a man on a mission. As the Chief Executive Officer of Maxtrack, he has been working to change the Malaysian public's perceptions of blinds, which have long been viewed as being more prosaic than aesthetic, and they are usually considered an afterthought rather than a vital factor in the home beautifying process. That is why he proposed that instead of the de rigeur buying a new curtain, families may want to turn to the blinds side this coming season.

### **Synopsis**

External Venetian Blinds are one of the most versatile and effective methods of solar control in buildings. They maximize the use of incoming natural daylight while reducing glare and thermal gain. They help decrease the consumption of energy, providing long-term financial savings and benefits to the environment.

External Venetian Blinds are engineered to withstand harsh weather conditions and are available in a range of sizes, finishes and colours. They are suitable for a variety of applications including large door and window openings up to 45 square metres.

#### **Features:**

- Fully motorized and automated control for raising, lowering and tilting of blades.
- PVC free coated Guide wires, lift tapes and ladder cord are designed to reduce vibration due to wind.
- Wind-sensing controls tilt and retract blinds when needed.
- Blades have a polyester coil coating and stove enameled finish.
- Perforated blades allow various degrees of openness to maintain exterior views even when blinds are fully closed.
