PAMSC TECHNICAL TALK 1/2024

ACON AAC LIGHT WEIGHT BLOCKS & AAC PANEL

Devan A/L Amirthalingam

Norazizah

Alam-Con Sdn Bhd

Autoclaved Aerated Concrete (AAC) Block is the flagship product of Alam-Con Sdn Bhd, which has been auspiciously known in the market as Acon Blocks. The technological breakthrough in this product offers numerous advantages to the construction works. The sophisticated autoclaved technology synergizes with optimized mix proportions of the raw materials enable the Acon Blocks to exhibit excellent engineering properties as in the clay brick at one fifth of its density and yet at a very competitive price. All these are the meticulous effort over the years by the founder of Alam-Con Sdn Bhd. And his team as well as their expert research team which serve as their strong backbone.

And: LET'S TALK DESIGN with
GDP ARCHITECTS SDN BHD; (SARAWAK OFFICE)

Ar. Intan Syazwani Sazali is a Sarawakian architect with over 15 years of combined industry experience in Kuching and Kuala Lumpur. She is now the Director of GDP Architects Sdn Bhd; Sarawak office. She was the project leader for 2023 PAM Gold Award winner, Lucentia Residences at Bukit Bintang City Center, Kuala Lumpur. Located in Kuala Lumpur's city centre and part of the Bukit Bintang City Center (BBCC) integrated master plan development, Lucentia Residences is a new community living solution created within a dense urban setting. A mix of residential unit types made up of studios and one to two bedroom apartments, the diverse configuration is ideal for young professionals and families seeking a peaceful respite within the city. The design approach creates a contemporary dwelling, where an interplay of angles, color and texture are applied through a seamless architectural language – a distinct addition to Kuala Lumpur's city skyline.
