

# PAMSC TECHNICAL TALK 2/2024

## DESIGN AND STRUCTURAL APPROACH TO CEILING SYSTEMS - CASE STUDIES

by **KNAUF** Malaysia

- What makes a good ceiling system? It is not just about having the best product but to understand the needs and intent of the design that meet its usages.
- It is important to understand what are the criteria, possible risks in the design, followed by the construction that completes a good ceiling system.
- By having examples of case studies, we will explore and look at the possible causes of ceiling failures and lessons learnt from them.

speakers -

**BRIAN WONG**

Head of Technical Services
