SPEAKER'S BIO

Kiat Ann Shun

With a background in Mechanical Engineering, Kiat has dedicated to **mastering steel design** within the construction and building industry with seven years working experiences with StiFlex. Currently serving as Lead Engineer in Dyntek Marketing, Kiat oversees the design, implementation, and optimization of steel structures tailored specifically for masonry construction projects.

During his tenure at StiFlex, Kiat played a pivotal role in an array of projects, ranging from **towering skyscrapers to industrial buildings**. His unwavering commitment to delivering top-notch solutions has been evident in his collaborative efforts with architects and his seamless coordination with construction teams, ensuring projects are executed with maximum efficiency and precision.

SYNOPSIS

SESSION #1: TECHNICAL TALK

STIFLEX STEEL MODULAR SYSTEM

StiFlex, a modular system of steel profiles, connectors and wall ties, designed to stiffen and strengthen internal and external walls, is a system directly replaces traditional cast-in-situ method.

StiFlex stiffener can be applied on **masonry walls in any forms**, whether in lightweight concrete block, brick, or panel, including dry walls.

StiFlex is **quicker and easier** to install, providing savings in time and manpower without compromising on any expected relevant conformance.

SPAKER'S BIO

Ar. Goh Tze Hui

Ar. Goh Tze Hui, a graduate of the University of Sydney in 2014, began her professional training at Arkitek JFN Sdn Bhd in Kuching, Sarawak under the mentorship of Ar. Mike Boon. She is involved in diverse projects ranging from **conservation** to the **rejuvenation** of urban spaces.

Her **recent involvement** includes the crowdfunding public art installation, "Alone . Together", which received Pertubuhan Akitek Malaysia (PAM) Award Commendations (Special Category) in 2022. In 2023, she was selected as one of the "40 under 40 : Malaysian Emerging Architects" by PAM.

SYNOPSIS

SESSION #2: LET'S TALK DESIGN

LEARNING FROM THE PEOPLE

Throughout her practice, Tze Hui finds joy in **interacting with various people** involved in the process and is constantly inspired by the insights gained from these interactions.

Her talk will draw on **experiences from past projects** and share the invaluable lessons learned from these collaborations and **community outreach efforts**. She believes these engagements will contribute to collectively improving the built environment.
