Preface

In recent developments, local authorities in Miri, Bintulu, and Padawan have begun implementing the e-Submission process for building plan submissions through the eLA system. We've received information that this online submission system is expected to be fully rolled out to all local authorities by the end of the year.

Additionally, the eSPA submission system has been in place for some time now.

In light of these changes, we are organizing this workshop **to gather feedback from members regarding any issues and challenges** you may have encountered with online submissions, as well as suggestions for improvement, if any.

This workshop is **open to all members, particularly those who have submitted plans via eSPA and eLA**, including graduate members who submitted on behalf of the Submitting Person. Your feedback is essential in assisting us in addressing these matters with the relevant government agencies and ministries.

We look forward to your participation.

Practice & Government Liaison, PAMSC
