Synopsis

Technology continues to revolutionize how we live, and as with every transformative era, Design and Architecture must evolve to meet the moment. Looking ahead, how will Design, Architecture, and Technology collaborate to shape a more advanced, seamless future?

Aritco Lift AB, an award-winning platform lift manufacturer based in Sweden, has been at the forefront of innovation, designing and producing modern home and platform lifts with unparalleled craftsmanship. Merging Scandinavian design principles with cutting-edge technology and robust safety features, Aritco lifts offer an elegant solution for a variety of spaces. Powered by a patented screw-and-nut system, these lifts ensure a smooth and secure ride, with a built-in backup battery system to maintain functionality during power outages. Beyond practicality, Aritco has redefined platform lifts as a fusion of form and function, integrating luxurious aesthetics that blend seamlessly with diverse architectural styles and interior décors.

In Sarawak, Lifkon SWK Enterprises Sdn Bhd embodies the spirit of innovation and modern living. As Aritco's exclusive distributor in East Malaysia, Lifkon specializes in the supply, installation, maintenance, and repair of premium lifts. Its state-of-the-art Swedish Aritco home lift showroom in Kuching is the first of its kind in Sarawak, offering clients a hands-on experience with these exceptional products. Lifkon's comprehensive services ensure that architects and homeowners can confidently embrace Aritco lifts, knowing that expert support is readily available throughout the process.

This collaboration between Aritco and Lifkon provides Sarawakian architects with the tools and assurance to incorporate premium home lifts into their designs, elevating the standard of living across the region. By fostering this partnership, Lifkon and the architectural community can work together to create innovative portfolios that redefine modern living in Sarawak.
