## Technical Talk No. 5/2025 A landmark for a Malay kampung at the heart of old Kuching

An Iconic Bridge at the heart of Malay Kampung. Redefining the local Malay culture at the heart of the Old Kuching. A practical, yet iconic structure that serves the community, but at the same time, serves as a landmark for the local Malays. The important aspect of the project is not really the design, but the issues that relate to it, which involve the community, government sectors and force majeure.

A look into how conceptual design progress into Bill of Materials (BOM) list or commonly known as cutlist for production, cutting process, finishing coats with colours, packaging and finally installation on site to deliver architectural concept to reality.
