

PAMSC TECHNICAL TALK 7/2025

UAC – VERSATILITY IN MODERN CONSTRUCTION

UAC – FIBRE CEMENT BOARD & IBS WALL SYSTEM

This presentation explores the versatility and performance of UAC Fibre Cement Board and the UAC IBS Wall System in a wide range of construction applications. Certified to both local and international standards, these systems deliver durability, moisture resistance, and design flexibility for ceilings, wall claddings, fascia boards, skirtings, and full-height wall structures. Leveraging the speed and precision of Industrialised Building System (IBS) methods, they enable faster installation, cost efficiency, and consistent quality. Through real project case studies, attendees will see how UAC solutions meet both structural requirements and aesthetic goals across residential, commercial, and industrial projects—making them a trusted choice for modern, sustainable building practices.

SPEAKER

Hibatul Haqqi bin Sapie

Specification consultant, UAC Berhad

Specification Consultant with over 10 years of experience in sales and marketing, specialising in fibre cement board solutions for ceilings, IBS systems, and façades. He holds a Master's in Office Management and represents UAC Berhad, a leading Malaysian manufacturer of cellulose fibre cement boards committed to sustainability and innovation in the architectural industry.
